### Purpose
This document provides you with key information about this investment product. It is not marketing material. This information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

### Product
Commodity Contracts for Difference are offered by Ava Trade EU Limited trading as AvaTrade (“Ava”, “we” “us”), authorised and regulated by the Central Bank of Ireland C53877. 
See [www.avatrade.com](http://www.avatrade.com) for more information or contact us on +353 1 901 0120

This Key Information Document is dated 1 January 2018.

⚠️ You are about to purchase a product that is not simple and may be difficult to understand.

### What is this product?

**Type**
A contract for difference (“CFD”) is an investment contract between you and us where the profit or loss is the difference between the opening and closing price of the contract. The price of a Commodity CFD contract is determined by reference to the price of the quoted underlying commodity (for example oil, gas, gold and silver).

No trade will entitle you to any rights in relation to the underlying currencies including any rights to delivery, acquisition or ownership.

One of the key features of CFDs is that they are traded on a margin or leverage basis meaning that you will only need to commit a small proportion of the notional value of the contract as margin. This means however that the size of your positions and potential profits and losses are magnified relative to your investment resulting in greater risks. It also means that you may lose more than you invest.

**Objectives**
The objective of a CFD is to enable you to speculate on the price of the underlying instruments using leverage. You may trade this product by either buying contracts or selling contracts depending on your view as to whether the quoted price of the underlying Commodity will increase or decrease. In buying a contract you anticipate that the price will increase (you go long) and in selling you anticipate the price to fall (you go short). Movements in price in the underlying Commodity will generate nominal profits or losses on your account. You may close your trade at any time with a view to realising a profit or loss.

There is no recommended holding period as each investor must determine what they consider to be right based upon their own trading strategy and objectives.
You must maintain sufficient margin on your account to keep your trades open. This may mean investing more in a very short timeframe if the price moves against you. If you do not maintain the required margin level, we may unilaterally close your trades.

**Intended Retail Investor**

We recommend that only clients that have relevant and specific knowledge and experience in leveraged derivative trading should trade CFDs. The products are typically short term in nature and carry a high risk of loss, including more than your initial investment. Clients should also satisfy themselves that they have the financial resources to trade and to bear any potential losses.

**What are the risks and what could I get in return?**

**Risk Indicator**

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 7 out of 7, which is the highest risk class. This rates the potential losses from future performance of the product at a very high level.

**Be aware of currency risk.** You will receive payments in a different currency, so the final return to you will depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

In some circumstances you may be required to make further payments to pay for losses. The total loss you may incur may significantly exceed the amount invested.

Your profits and loss will be directly impacted by fluctuations in volatility and liquidity of the underlying currencies of the CFD. Prices movements may be significant and may ‘gap’ so that pricing is not consecutive. As you are trading on leverage the speed at which you may generate profits or losses and their size is magnified. We may automatically close your trades if you do not maintain the required margin.

This product does not include any protection from future market performance, you may lose some or all of your investment. If (we) (are) not able to pay you what is owed, you could lose your entire investment. However, you may benefit from a consumer protection scheme (see the section ‘what happens if we are unable to pay you’). The indicator shown above does not consider this protection.

**Performance Scenarios**

Example based upon purchase of 100 lots of Gold

**Price Quoted:** $1,200 per ounce

**Leverage:** 200:1

**Notional Value:** $120,000 (100 x 1,200)

**Initial Margin Requirement:** £600.00 (Notional Value / 200)

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. The return on your investment will vary depending on how the market performs and how long the position is held. The stress scenario shows what you might get back in extreme market circumstances, and it does not take account of the situation where we are not able to pay you.

The figures shown include all the costs of the product itself, but may not include all the costs payable to your advisor or distributor.

The figures do not take account of your personal tax situation, which may also affect your return.

**What happens if Ava is unable to pay you?**

In the unlikely event that Ava are unable to pay you, for example due to insolvency, you may lose the value of your investment. However, we segregate all retail client money from Ava money in accordance with the Client Asset Regulations. You have some protection from the Investor Compensation Scheme (“ICS”). This product is categorised as an investment product under the ICS so eligible claimants are covered up to the first €20,000 of loss. Further information about the compensation arrangements is available at [www.investorcompensation.ie](http://www.investorcompensation.ie).

**What are the costs?**

The table below shows the different costs that you may incur in trading a Commodity CFD.

**How long should I hold it and can I take money out early?**
Commodity CFDs are intended for short-term trading, in some cases intraday, and are generally not suitable for long-term investments. Commodity CFDs do not have a recommended or required minimum holding period. As an execution only product, you may choose to close your position at any time without additional fees or penalty.

**How can I complain?**
To raise a complaint, please contact our Customer Support team via email at cs@avatrade.com. We will endeavour to resolve all issues within an expedient timeframe. If you are not satisfied with the response from our Customer Service agent, or you are unable to resolve the issue, then you may raise the matter as a complaint with our Complaints team by writing to us at complaints@avatrade.com or Ava Trade EU Limited Compliance Department, Five Lamps Place, Amiens Street, Mountjoy, Dublin, D01 A7V2. Our full Complaints Policy, including details of the Financial Ombudsman Service can be found here: [http://www.avatrade.com/about-avatrade/legal-documentation](http://www.avatrade.com/about-avatrade/legal-documentation)

**Other relevant information**
This document is a summary of key information about Commodity CFDs. It is designed to help you make an informed decision before your trade. This is a summary only and nothing in this document should be considered as advice.

Before deciding whether to open an account or to trade any of our products we strongly suggest that you read our full terms and policies, including: our full Terms and Conditions, Conflicts of Interest Policy and Order Execution Policy, among other things. These documents can be found here: [http://www.avatrade.com/about-avatrade/legal-documentation](http://www.avatrade.com/about-avatrade/legal-documentation)
Key information document – Commodity Spread Bet

Purpose
This document provides you with key information about this investment product. It is not marketing material. This information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product
Commodity Spread Bets are offered by Ava Trade EU Limited trading as AvaTrade (“Ava”, “we” “us”), authorised and regulated by the Central Bank of Ireland CS3877. See www.avatrade.com for more information or contact us on +353 1 901 0120

This Key Information Document is dated 1 January 2018.

⚠️ You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type
A Spread Bet is an investment contract between you and us where the profit or loss is the difference between the opening and closing price of the contract. The price of a Commodity Spread Bet contract is determined by reference to the price of the quoted underlying currency pairs. Spread Bets contracts are priced at 1 GBP or EUR per point change in the underlying instrument irrespective of the underlying instrument’s base currency.

No trade will entitle you to any rights in relation to the underlying currencies including any rights to delivery, acquisition or ownership.

One of the key features of Spread Bets is that they are traded on a margin or leveraged basis, and you will only need to commit a small proportion of the notional value of the contract as margin. This means; however, that the size of your positions and potential profits and losses are magnified relative to your investment resulting in greater risks. It also means that you may lose more than you invest.

Objectives
The objective of a Spread Bet is to enable you to speculate on the price of the underlying instruments using leverage. You may trade this product by either buying contracts or selling contracts depending on your view as to whether the quoted price of the underlying currency pairs will increase or decrease against the other quoted currency (a currency pair). In buying a contract you anticipate that the price will increase (you go long) and in selling you anticipate the price to fall (you go short). Movements in price in the underlying currency pairs will generate nominal profits or losses on your account. You may close your trade at any time with a view to realising a profit or loss.

There is no recommended holding period as each investor must determine what they consider to be right based upon their own trading strategy and objectives.
You must maintain sufficient margin on your account to keep your trades open. This may mean investing more in a very short timeframe if the price moves against you. If you do not maintain the required margin level, we may unilaterally close your trades.

**Intended Retail Investor**

We recommend that only clients that have relevant and specific knowledge and experience in leveraged derivative trading should trade Spread Bets. The products are typically short term in nature and carry a high risk of loss, including more than your initial investment. Clients should also satisfy themselves that they have the financial resources to trade and to bear any potential losses.

**What are the risks and what could I get in return?**

**Risk Indicator**

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 7 out of 7, which is the highest risk class. This rates the potential losses from future performance of the product at a very high level.

**Be aware of currency risk.** You will receive payments in a different currency, so the final return to you will depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

In some circumstances, you may be required to make further payments to pay for losses. The total loss you may incur may significantly exceed the amount invested.

Your profits and loss will be directly impacted by fluctuations in volatility and liquidity of the underlying currencies of the Spread bet. Prices movements may be significant and may ‘gap’ so that pricing is not consecutive. As you are trading on leverage the speed at which you may generate profits or losses and their size is magnified. We may automatically close your trades if you do not maintain the required margin.

This product does not include any protection from future market performance, you may lose some or all of your investment. If (we) (are) not able to pay you what is owed, you could lose your entire investment. However, you may benefit from a consumer protection scheme (see the section ‘what happens if we are unable to pay you’). The indicator shown above does not consider this protection.

**Performance Scenarios**

Example based upon purchase of 1 Lots of Gold (1 Lot = 100oz Gold) at £1 a point

**Price of Underlying Quoted:** $1,200.00 per ounce.

**Leverage:** 200:1

**Notional Value:** £120,000 (100 x 1,200)

**Initial Margin Requirement:** £600.00 (Notional Value / 200)
The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. The return on your investment will vary depending on how the market performs and how long the position is held. The stress scenario shows what you might get back in extreme market circumstances, and it does not take account of the situation where we are not able to pay you.

The figures shown include all the costs of the product itself, but may not include all the costs payable to your advisor or distributor.

The figures do not take account of your personal tax situation, which may also affect your return.

What happens if Ava is unable to pay you?
In the unlikely event that Ava are unable to pay you, for example due to insolvency, you may lose the value of your investment. However, we segregate all retail client money from Ava money in accordance with the Client Asset Regulations. You have some protection from the Investor Compensation Scheme (“ICS”). This product is categorised as an investment product under the ICS so eligible claimants are covered up to the first €20,000 of loss. Further information about the compensation arrangements is available at www.investorcompensation.ie.

Key information document – Cryptocurrency Contract for Difference

Purpose
This document provides you with key information about this investment product. It is not marketing material. This information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product
Cryptocurrency Contracts for Difference are offered by Ava Trade EU Limited trading as AvaTrade (“Ava”, “we” “us”), authorised and regulated by the Central Bank of Ireland C53877. See www.avatrade.com for more information or contact us on +353 1 901 0120

This Key Information Document is dated 1 January 2018.

⚠️ You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type
A contract for difference (“CFD”) is an investment contract between you and us where the profit or loss is the difference between the opening and closing price of the contract. The price of a Cryptocurrency CFD contract is determined by reference to the price of the quoted underlying currency pairs.

No trade will entitle you to any rights in relation to the underlying cryptocurrencies including any rights to delivery, acquisition or ownership.

One of the key features of CFDs is that they are traded on a margin or leveraged basis, and you will only need to commit a small proportion of the notional value of the contract as margin. This means; however, that the size of your positions and potential profits and losses are magnified relative to your investment resulting in greater risks. It also means that you may lose more than you invest.

Objectives
The objective of a CFD is to enable you to speculate on the price of the underlying instruments using leverage. You may trade this product by either buying contracts or selling contracts depending on your view as to whether the price of the cryptocurrency quoted will increase or decrease against the other quoted currency (a cryptocurrency pair). In buying a contract you anticipate that the price will increase (you go long) and in selling you anticipate the price to fall (you go short). Movements in price in the underlying cryptocurrency pairs will generate nominal profits or losses on your account. You may close your trade at any time with a view to realising a profit or loss.

There is no recommended holding period as each investor must determine what they consider to be right based upon their own trading strategy and objectives.
You must maintain sufficient margin on your account to keep your trades open. This may mean investing more in a very short timeframe if the price moves against you. If you do not maintain the required margin level, we may unilaterally close your trades.

**Intended Retail Investor**

We recommend that only clients that have relevant and specific knowledge and experience in leveraged derivative trading should trade CFDs. The products are typically short term in nature and carry a high risk of loss, including more than your initial investment. Clients should also satisfy themselves that they have the financial resources to trade and to bear any potential losses.

**What are the risks and what could I get in return?**

**Risk Indicator**

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 7 out of 7, which is the highest risk class. This rates the potential losses from future performance of the product at a very high level.

**Be aware of currency risk.** You will receive payments in a different currency, so the final return to you will depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

In some circumstances, you may be required to make further payments to pay for losses. **The total loss you may incur may significantly exceed the amount invested.**

Your profits and loss will be directly impacted by fluctuations in volatility and liquidity of the underlying currencies of the CFD. Prices movements may be significant and may ‘gap’ so that pricing is not consecutive. As you are trading on leverage the speed at which you may generate profits or losses and their size is magnified. We may automatically close your trades if you do not maintain the required margin.

This product does not include any protection from future market performance, you may lose some or all of your investment. If (we) (are) not able to pay you what is owed, you could lose your entire investment. However, you may benefit from a consumer protection scheme (see the section ‘what happens if we are unable to pay you’). The indicator shown above does not consider this protection.

**Performance Scenarios**

Example based upon purchase of 3 contracts on BTC/US

**Price Quoted:** $15,000 USD  
**Leverage:** 5:1  
**Notional Value:** $45,000 (3 x 15,000)
**Initial Margin Requirement:** $9,000.00 (Notional Value / 5)

## Key information document – Equity Contract for Difference

### Purpose
This document provides you with key information about this investment product. It is not marketing material. This information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

### Product
Equity Contracts for Difference are offered by Ava Trade EU Limited trading as AvaTrade (“Ava”, “we” “us”), authorised and regulated by the Central Bank of Ireland C53877. See [www.avatrade.com](http://www.avatrade.com) for more information or contact us on +353 1 901 0120

This Key Information Document is dated 1 January 2018.

⚠️ You are about to purchase a product that is not simple and may be difficult to understand.

### What is this product?

#### Type
A contract for difference (“CFD”) is an investment contract between you and us where the profit or loss is the difference between the opening and closing price of the contract. The price of an Equity CFD contract is determined by reference to the price of the quoted underlying equity (for example Barclays Plc, BP Plc, Apple Inc., Amazon).

No trade will entitle you to any rights in relation to the underlying currencies including any rights to delivery, acquisition or ownership.

One of the key features of CFDs is that they are traded on a margin or leveraged basis, and you will only need to commit a small proportion of the notional value of the contract as margin. This means; however, that the size of your positions and potential profits and losses are magnified relative to your investment resulting in greater risks. It also means that you may lose more than you invest.

#### Objectives
The objective of a CFD is to enable you to speculate on the price of the underlying instruments using leverage. You may trade this product by either buying contracts or selling contracts depending on your view as to whether the quoted price of the underlying equity will increase or decrease. In buying a contract you anticipate that the price will increase (you go long) and in selling you anticipate the price to fall (you go short). Movements in price in the underlying equity will generate nominal profits or losses on your account.

You may close your trade at any time with a view to realising a profit or loss.

There is no recommended holding period as each investor must determine what they consider to be right based upon their own trading strategy and objectives.
You must maintain sufficient margin on your account to keep your trades open. This may mean investing more in a very short timeframe if the price moves against you. If you do not maintain the required margin level, we may unilaterally close your trades.

**Intended Retail Investor**

We recommend that only clients that have relevant and specific knowledge and experience in leveraged derivative trading should trade CFDs. The products are typically short term in nature and carry a high risk of loss, including more than your initial investment. Clients should also satisfy themselves that they have the financial resources to trade and to bear any potential losses.

**What are the risks and what could I get in return?**

**Risk Indicator**

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 7 out of 7, which is the highest risk class. This rates the potential losses from future performance of the product at a very high level.

**Be aware of currency risk.** You will receive payments in a different currency, so the final return to you will depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

In some circumstances, you may be required to make further payments to pay for losses. **The total loss you may incur may significantly exceed the amount invested.**

Your profits and loss will be directly impacted by fluctuations in volatility and liquidity of the underlying currencies of the CFD. Prices movements may be significant and may ‘gap’ so that pricing is not consecutive. As you are trading on leverage the speed at which you may generate profits or losses and their size is magnified. We may automatically close your trades if you do not maintain the required margin.

This product does not include any protection from future market performance, you may lose some or all of your investment. If (we) (are) not able to pay you what is owed, you could lose your entire investment. However, you may benefit from a consumer protection scheme (see the section ‘what happens if we are unable to pay you’). The indicator shown above does not consider this protection.

**Performance Scenarios**

Example based upon purchase of 100 contracts of Barclays Plc

- **Price Quoted:** 200
- **Leverage:** 10:1
- **Notional Value:** £20,000 (100 x 200) **Initial Margin Requirement:** £2,000.00 (Notional Value / 10)
### Long Trade (held intraday)

### Short Trade (held intraday)

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. The return on your investment will vary depending on how the market performs and how long the position is held. The stress scenario shows what you might get back in extreme market circumstances, and it does not take account of the situation where we are not able to pay you.

The figures shown include all the costs of the product itself, but may not include all the costs payable to your advisor or distributor.

The figures do not take account of your personal tax situation, which may also affect your return.

### What happens if Ava is unable to pay you?

In the unlikely event that Ava are unable to pay you, for example due to insolvency, you may lose the value of your investment. However, we segregate all retail client money from Ava money in accordance with the Client Asset Regulations. You have some protection from the Investor Compensation Scheme (“ICS”). This product is categorised as an investment product under the ICS so eligible claimants are covered up to the first €20,000 of loss. Further information about the compensation arrangements is available at [www.investorcompensation.ie](http://www.investorcompensation.ie).

### What are the costs?

The table below shows the different costs that you may incur in trading an Equity CFD.

How long should I hold it and can I take money out early?

Equity CFDs are intended for short-term trading, in some cases intraday, and are generally not suitable for long-term investments. Equity CFDs do not have a recommended or required minimum holding period. As an execution only product, you may choose to close your position at any time without additional fees or penalty.

How can I complain?

To raise a complaint, please contact our Customer Support team via email at cs@avatrade.com. We will endeavour to resolve all issues within an expedient timeframe. If you are not satisfied with the response from our Customer Service agent, or you are unable to resolve the issue, then you may raise the matter as a complaint with our Complaints team by writing to us at complaints@avatrade.com or Ava Trade EU Limited Compliance Department, Five Lamps Place, Amiens Street, Mountjoy, Dublin, D01 A7V2. Our full Complaints Policy, including details of the Financial Ombudsman Service can be found here: http://www.avatrade.com/about-avatrade/legal-documentation

Other relevant information

Key information document – Forex Contract for Difference

Purpose
This document provides you with key information about this investment product. It is not marketing material. This information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product
Forex Contracts for Difference are offered by Ava Trade EU Limited trading as Ava Trade (“Ava”, “we” “us”), authorised and regulated by the Central Bank of Ireland C53877. See www.avatrade.com for more information or contact us on +353 1 901 0120

This Key Information Document is dated 1 January 2018.

⚠️ You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type
A contract for difference (“CFD”) is an investment contract between you and us where the profit or loss is the difference between the opening and closing price of the contract. The price of a Forex CFD contract is determined by reference to the price of the quoted underlying currency pairs.
No trade will entitle you to any rights in relation to the underlying currencies including any rights to delivery, acquisition or ownership.

One of the key features of CFDs is that they are traded on a margin or leveraged basis, and you will only need to commit a small proportion of the notional value of the contract as margin. This means; however, that the size of your positions and potential profits and losses are magnified relative to your investment resulting in greater risks. It also means that you may lose more than you invest.

Objectives
The objective of a CFD is to enable you to speculate on the price of the underlying instruments using leverage. You may trade this product by either buying contracts or selling contracts depending on your view as to whether the price of one currency quoted will increase or decrease against the other quoted currency (a currency pair). In buying a contract you anticipate that the price will increase (you go long) and in selling you anticipate the price to fall (you go short). Movements in price in the underlying currency pairs will generate nominal profits or losses on your account. You may close your trade at any time with a view to realising a profit or loss.

There is no recommended holding period as each investor must determine what they consider to be right based upon their own trading strategy and objectives.
You must maintain sufficient margin on your account to keep your trades open. This may mean investing more in a very short timeframe if the price moves against you. If you do not maintain the required margin level, we may unilaterally close your trades.

**Intended Retail Investor**

We recommend that only clients that have relevant and specific knowledge and experience in leveraged derivative trading should trade CFDs. The products are typically short term in nature and carry a high risk of loss, including more than your initial investment. Clients should also satisfy themselves that they have the financial resources to trade and to bear any potential losses.

**What are the risks and what could I get in return?**

**Risk Indicator**

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 7 out of 7, which is the highest risk class. This rates the potential losses from future performance of the product at a very high level.

**Be aware of currency risk.** You will receive payments in a different currency, so the final return to you will depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

In some circumstances, you may be required to make further payments to pay for losses. **The total loss you may incur may significantly exceed the amount invested.**

Your profits and loss will be directly impacted by fluctuations in volatility and liquidity of the underlying currencies of the CFD. Prices movements may be significant and may ‘gap’ so that pricing is not consecutive. As you are trading on leverage the speed at which you may generate profits or losses and their size is magnified. We may automatically close your trades if you do not maintain the required margin.

This product does not include any protection from future market performance, you may lose some or all of your investment. If (we) are not able to pay you what is owed, you could lose your entire investment. However, you may benefit from a consumer protection scheme (see the section ‘what happens if we are unable to pay you’). The indicator shown above does not consider this protection.

**Performance Scenarios**

Example based upon purchase of 1 Lot on EUR/USD (1 Lot = 100,000 units of the quoted currency)

**Price Quoted:** 1.17700

**Leverage:** 200:1  
**Notional Value:** $117,700  
(100,000 x 1.17700)

**Initial Margin Requirement:** $588.50  
(Notional Value / 200)
The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. The return on your investment will vary depending on how the market performs and how long the position is held. The stress scenario shows what you might get back in extreme market circumstances, and it does not take account of the situation where we are not able to pay you.

The figures shown include all the costs of the product itself, but may not include all the costs payable to your advisor or distributor.

The figures do not take account of your personal tax situation, which may also affect your return.

What happens if Ava is unable to pay you?
In the unlikely event that Ava are unable to pay you, for example due to insolvency, you may lose the value of your investment. However, we segregate all retail client money from Ava money in accordance with the Client Asset Regulations. You have some protection from the Investor Compensation Scheme (“ICS”). This product is categorised as an investment product under the ICS so eligible claimants are covered up to the first €20,000 of loss. Further information about the compensation arrangements is available at [www.investorcompensation.ie](http://www.investorcompensation.ie).

# Key information document – Forex Spread Bet

## Purpose
This document provides you with key information about this investment product. It is not marketing material. This information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

## Product
Forex Spread Bets are offered by Ava Trade EU Limited trading as Ava Trade (“Ava”, “we” “us”), authorised and regulated by the Central Bank of Ireland CS3877.

See [www.avatrade.com](http://www.avatrade.com) for more information or contact us on +353 1 901 0120.

This Key Information Document is dated 1 January 2018.

⚠️ You are about to purchase a product that is not simple and may be difficult to understand.

## What is this product?

### Type
A Spread Bet is an investment contract between you and us where the profit or loss is the difference between the opening and closing price of the contract. The price of a Forex Spread Bet contract is determined by reference to the price of the quoted underlying currency pairs. Spread Bets contracts are priced at 1 GBP or EUR per point change in the underlying instrument irrespective of the underlying instrument’s base currency.

No trade will entitle you to any rights in relation to the underlying currencies including any rights to delivery, acquisition or ownership.

One of the key features of Spread Bets is that they are traded on a margin or leveraged basis, and you will only need to commit a small proportion of the notional value of the contract as margin. This means; however, that the size of your positions and potential profits and losses are magnified relative to your investment resulting in greater risks. It also means that you may lose more than you invest.

### Objectives
The objective of a Spread Bet is to enable you to speculate on the price of the underlying instruments using leverage. You may trade this product by either buying contracts or selling contracts depending on your view as to whether the quoted price of the underlying currency pairs will increase or decrease against the other quoted currency (a currency pair). In buying a contract you anticipate that the price will increase (you go long) and in selling you anticipate the price to fall (you go short). Movements in price in the underlying currency pairs will generate nominal profits or losses on your account. You may close your trade at any time with a view to realising a profit or loss.
There is no recommended holding period as each investor must determine what they consider to be right based upon their own trading strategy and objectives.

You must maintain sufficient margin on your account to keep your trades open. This may mean investing more in a very short timeframe if the price moves against you. If you do not maintain the required margin level, we may unilaterally close your trades.

**Intended Retail Investor**

We recommend that only clients that have relevant and specific knowledge and experience in leveraged derivative trading should trade Spread Bets. The products are typically short term in nature and carry a high risk of loss, including more than your initial investment. Clients should also satisfy themselves that they have the financial resources to trade and to bear any potential losses.

**What are the risks and what could I get in return?**

**Risk Indicator**

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 7 out of 7, which is the highest risk class. This rates the potential losses from future performance of the product at a very high level.

**Be aware of currency risk.** You will receive payments in a different currency, so the final return to you will depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

In some circumstances, you may be required to make further payments to pay for losses. **The total loss you may incur may significantly exceed the amount invested.**

Your profits and loss will be directly impacted by fluctuations in volatility and liquidity of the underlying currencies of the Spread bet. Prices movements may be significant and may ‘gap’ so that pricing is not consecutive. As you are trading on leverage the speed at which you may generate profits or losses and their size is magnified. We may automatically close your trades if you do not maintain the required margin.

This product does not include any protection from future market performance, you may lose some or all of your investment. If (we) (are) not able to pay you what is owed, you could lose your entire investment. However, you may benefit from a consumer protection scheme (see the section ‘what happens if we are unable to pay you’). The indicator shown above does not consider this protection.

**Performance Scenarios**

Example based upon purchase of 1 Lot on EUR/USD (1 Lot = 10,000 units of the quoted currency) at £1 a point
Price of Underlying Quoted: 1.17700
Leverage: 200:1
Notional Value: $11,700 (10,000 x 1.17700)
Initial Margin Requirement: $58.85 (Notional Value / 200)

Our full Complaints Policy, including details of the Financial Ombudsman Service can be found here: [http://www.avatrade.com/about-avatrade/legal-documentation](http://www.avatrade.com/about-avatrade/legal-documentation).

### Other relevant information

This document is a summary of key information about Forex spread bets. It is designed to help you make an informed decision before your trade. This is a summary only and nothing in this document should be considered as advice.

Before deciding whether to open an account or to trade any of our products we strongly suggest that you read our full terms and policies, including: our full Terms and Conditions, Conflicts of Interest Policy and Order Execution Policy, among other things. These documents can be found here: [http://www.avatrade.com/about-avatrade/legal-documentation](http://www.avatrade.com/about-avatrade/legal-documentation).
### Purpose
This document provides you with key information about this investment product. It is not marketing material. This information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

### Product
FX Options are offered by Ava Trade EU Limited trading as AvaTrade ("Ava", “we” “us”), authorised and regulated by the Central Bank of Ireland C53877.
See [www.avatrade.com](http://www.avatrade.com) for more information or contact us on +353 1 901 0120

This Key Information Document is dated 1 January 2018.

⚠️ You are about to purchase a product that is not simple and may be difficult to understand.

### What is this product?

#### Type
An FX Option is a contract where the profit is to be secured or loss avoided by reference to fluctuations in the price, time, implied volatility and other market data of an underlying currency pair, such the Euro (EUR) against the U.S. Dollar (USD), referred to as EURUSD. Visit [http://www.avatrade.com/trading-platforms/ava-options-trading](http://www.avatrade.com/trading-platforms/ava-options-trading) for further information.

#### Objectives
The objective of trading an FX Option is to gain exposure to fluctuations related to the underlying currency pair without owning it. Your return depends on the size of the performance (or movement) of the underlying currency pair and the size of your position. This product is entered into for the purpose of speculation or hedging and is commonly traded on margin. Margin refers to the use of a small amount of capital to support an investment of a larger exposure. Please note that margin trading requires extra caution, because whilst you can realise large profits if the price moves in your favour, you risk extensive losses if the price moves against you.

#### Intended Retail Investor
Trading in this product will not be appropriate for everyone. This product would commonly be used by persons who want to generally gain short term exposures to financial instruments/markets; are using (trading with) money which they can afford to lose; have a diversified investment and savings portfolio; have a high-risk tolerance; and understand the impact of and risks associated with margin trading. Clients should also satisfy themselves that they have the financial resources to trade and to bear any potential losses.

### What are the risks and what could I get in return?

#### Risk Indicator
The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 7 out of 7, which is the highest risk class. This rates the potential losses from future performance of the product at a very high level.

This risk is not considered in the indicator shown above. In some circumstances you may be required to make further payments to pay for losses. Trading risks are magnified by leverage – the total loss you may incur may significantly exceed the amount invested. Values may fluctuate significantly in times of high volatility or market/economic uncertainty; such swings are even more significant if your positions are leveraged and may also adversely affect your position. As a result, margin calls may be made quickly or frequently. In the event of default, AvaTrade shall seek to immediately terminate, cancel and close-out all of any outstanding positions, and any shortfall will be borne by you. Trade only after you have acknowledged and accepted the risks. You should carefully consider whether trading in leveraged products is appropriate for you.

What happens if Ava is unable to pay you?
In the unlikely event that Ava are unable to pay you, for example due to insolvency, you may lose the value of your investment. However, we segregate all retail client money from Ava money in accordance with the Client Asset Regulations. You have some protection from the Investor Compensation Scheme ("ICS"). This product is categorised as an investment product under the ICS so eligible claimants are covered up to the first €20,000 of loss. Further information about the compensation arrangements is available at www.investorcompensation.ie.

# Key information document – Index Contract for Difference

## Purpose
This document provides you with key information about this investment product. It is not marketing material. This information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

## Product
Index Contracts for Difference are offered by Ava Trade EU Limited trading as AvaTrade (“Ava”, “we” “us”), authorised and regulated by the Central Bank of Ireland C53877.
See [www.avatrade.com](http://www.avatrade.com) for more information or contact us on +353 1 901 0120

This Key Information Document is dated 3 January 2018.

⚠️ You are about to purchase a product that is not simple and may be difficult to understand.

## What is this product?

### Type
A contract for difference (“CFD”) is an investment contract between you and us where the profit or loss is the difference between the opening and closing price of the contract. The price of an Index CFD contract is determined by reference to the price of the quoted underlying index (for example the US30, SPX500, UK100, AUS200, FRA40 or GER30).

No trade will entitle you to any rights in relation to the underlying index including any rights to delivery, acquisition or ownership.

One of the key features of CFDs is that they are traded on a margin or leveraged basis, and you will only need to commit a small proportion of the notional value of the contract as margin. This means; however, that the size of your positions and potential profits and losses are magnified relative to your investment resulting in greater risks. It also means that you may lose more than you invest.

### Objectives
The objective of a CFD is to enable you to speculate on the price of the underlying instruments using leverage. You may trade this product by either buying contracts or selling contracts depending on your view as to whether the quoted price of the underlying Index will increase or decrease. In buying a contract you anticipate that the price will increase (you go long) and in selling you anticipate the price to fall (you go short). Movements in price in the underlying Index will generate nominal profits or losses on your account. You may close your trade at any time with a view to realising a profit or loss.

There is no recommended holding period as each investor must determine what they consider to be right based upon their own trading strategy and objectives.
You must maintain sufficient margin on your account to keep your trades open. This may mean investing more in a very short timeframe if the price moves against you. If you do not maintain the required margin level, we may unilaterally close your trades.

**Intended Retail Investor**

We recommend that only clients that have relevant and specific knowledge and experience in leveraged derivative trading should trade CFDs. The products are typically short term in nature and carry a high risk of loss, including more than your initial investment. Clients should also satisfy themselves that they have the financial resources to trade and to bear any potential losses.

**What are the risks and what could I get in return?**

**Risk Indicator**

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 7 out of 7, which is the highest risk class. This rates the potential losses from future performance of the product at a very high level.

**Be aware of currency risk.** You will receive payments in a different currency, so the final return to you will depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

In some circumstances, you may be required to make further payments to pay for losses. **The total loss you may incur may significantly exceed the amount invested.**

Your profits and loss will be directly impacted by fluctuations in volatility and liquidity of the underlying currencies of the CFD. Prices movements may be significant and may ‘gap’ so that pricing is not consecutive. As you are trading on leverage the speed at which you may generate profits or losses and their size is magnified. We may automatically close your trades if you do not maintain the required margin.

This product does not include any protection from future market performance, you may lose some or all of your investment. If (we) (are) not able to pay you what is owed, you could lose your entire investment. However, you may benefit from a consumer protection scheme (see the section ‘what happens if we are unable to pay you’). The indicator shown above does not consider this protection.

**Performance Scenarios**

Example based upon purchase of 10 contracts of the UK 100

**Price Quoted:** 7,000

**Leverage:** 100:1

**Notional Value:** £70,000 (10 x 7,000)

**Initial Margin Requirement:** £700.00 (Notional Value / 100)

| Long Trade (held intraday) | Short Trade (held intraday) |
The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. The return on your investment will vary depending on how the market performs and how long the position is held. The stress scenario shows what you might get back in extreme market circumstances, and it does not take account of the situation where we are not able to pay you.

The figures shown include all the costs of the product itself, but may not include all the costs payable to your advisor or distributor.

The figures do not take account of your personal tax situation, which may also affect your return.

What happens if Ava is unable to pay you?
In the unlikely event that Ava are unable to pay you, for example due to insolvency, you may lose the value of your investment. However, we segregate all retail client money from Ava money in accordance with the Client Asset Regulations. You have some protection from the Investor Compensation Scheme ("ICS"). This product is categorised as an investment product under the ICS so eligible claimants are covered up to the first €20,000 of loss. Further information about the compensation arrangements is available at www.investorcompensation.ie.

### How long should I hold it and can I take money out early?
Index CFDs are intended for short-term trading, in some cases intraday, and are generally not suitable for long-term investments. Index CFDs do not have a recommended or required minimum holding period. As an execution only product, you may choose to close your position at any time without additional fees or penalty.

### How can I complain?
To raise a complaint, please contact our Customer Support team via email at cs@avatrade.com. We will endeavour to resolve all issues within an expedient timeframe. If you are not satisfied with the response from our Customer Service agent, or you are unable to resolve the issue, then you may raise the matter as a complaint with our Complaints team by writing to us at complaints@avatrade.com or Ava Trade EU Limited Compliance Department, Five Lamps Place, Amiens Street, Mountjoy, Dublin, D01 A7V2. Our full Complaints Policy, including details of the Financial Ombudsman Service can be found here: [http://www.avatrade.com/about-avatrade/legal-documentation](http://www.avatrade.com/about-avatrade/legal-documentation)

### Other relevant information
This document is a summary of key information about Index CFDs. It is designed to help you make an informed decision before your trade. This is a summary only and nothing in this document should be considered as advice.

Before deciding whether to open an account or to trade any of our products we strongly suggest that you read our full terms and policies, including: our full Terms and Conditions, Conflicts of Interest Policy and Order Execution Policy, among other things. These documents can be found here: [http://www.avatrade.com/about-avatrade/legal-documentation](http://www.avatrade.com/about-avatrade/legal-documentation)
Purpose
This document provides you with key information about this investment product. It is not marketing material. This information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product
Index Spread bets are offered by Ava Trade EU Limited trading as Ava Trade (“Ava”, “we” “us”), authorised and regulated by the Central Bank of Ireland C53877.
See www.avatrade.com for more information or contact us on +353 1 901 0120

This Key Information Document is dated 1 January 2018.

⚠️ You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type
A Spread Bet is an investment contract between you and us where the profit or loss is the difference between the opening and closing price of the contract. The price of an Index Spread Bet contract is determined by reference to the price of the quoted underlying index (for example the US30, SPX500, UK100, AUS200, FRA40 or GER30).

Spread Bets contracts are priced at 1 GBP or EUR per point change in the underlying instrument irrespective of the underlying instrument’s base currency.

No trade will entitle you to any rights in relation to the underlying currencies including any rights to delivery, acquisition or ownership.

One of the key features of Spread Bets is that they are traded on a margin or leveraged basis, and you will only need to commit a small proportion of the notional value of the contract as margin. This means; however, that the size of your positions and potential profits and losses are magnified relative to your investment resulting in greater risks. It also means that you may lose more than you invest.

Objectives
The objective of a Spread Bet is to enable you to speculate on the price of the underlying instruments using leverage. You may trade this product by either buying contracts or selling contracts depending on your view as to whether the quoted price of the underlying index will increase or decrease. In buying a contract you anticipate that the price will increase (you go long) and in selling you anticipate the price to fall (you go short). Movements in price in the underlying index will generate nominal profits or losses on your account. You may close your trade at any time with a view to realising a profit or loss.
There is no recommended holding period as each investor must determine what they consider to be right based upon their own trading strategy and objectives.

You must maintain sufficient margin on your account to keep your trades open. This may mean investing more in a very short timeframe if the price moves against you. If you do not maintain the required margin level, we may unilaterally close your trades.

**Intended Retail Investor**

We recommend that only clients that have relevant and specific knowledge and experience in leveraged derivative trading should trade Spread Bets. The products are typically short term in nature and carry a high risk of loss, including more than your initial investment. Clients should also satisfy themselves that they have the financial resources to trade and to bear any potential losses.

**What are the risks and what could I get in return?**

**Risk Indicator**

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 7 out of 7, which is the highest risk class. This rates the potential losses from future performance of the product at a very high level.

**Be aware of currency risk.** You will receive payments in a different currency, so the final return to you will depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

In some circumstances, you may be required to make further payments to pay for losses. The total loss you may incur may significantly exceed the amount invested.

Your profits and loss will be directly impacted by fluctuations in volatility and liquidity of the underlying currencies of the Spread bet. Prices movements may be significant and may ‘gap’ so that pricing is not consecutive. As you are trading on leverage the speed at which you may generate profits or losses and their size is magnified. We may automatically close your trades if you do not maintain the required margin.

This product does not include any protection from future market performance, you may lose some or all of your investment. If (we) (are) not able to pay you what is owed, you could lose your entire investment. However, you may benefit from a consumer protection scheme (see the section ‘what happens if we are unable to pay you’). The indicator shown above does not consider this protection.

**Performance Scenarios**

Example based upon purchase of 10 contracts of the UK 100 at £1 a point.
Price of Underlying Quoted: £7,000.00
Leverage: 200:1
Notional Value: £70,000 (10 x 7,000)
Initial Margin Requirement: £700.00 (Notional Value / 100)
